

Ferrotest

FM 880-B

FM 880-B Valve Rod Location Finder

The Valve Rod Location Finder FM 880-B is used for easily and reliably locating slide valves, valve rods and well linings and any other objects made of iron or steel as well as magnetic markers. Only ferromagnetic objects can be located (iron or steel). Non-magnetic objects such as cans (made of aluminium), crown corks are not signalled. The FM 880-B can easily be adjusted by means of its rotating knob and indicating instrument. Both the null mode and the crest mode of measurement can be employed.

Technical Specification

Weight	1 kg
Dimensions	109.2 x 6.4 x 3.8 cm
Power supply	2 units E Block 9 V
Depth range	1.20 m

FT 80

The FT 80 is used for locating hidden slide dampers, hydrant caps and any other metal parts in horizontal position with a diameter of 0.1 m or larger. Any kind of metal will be detected, including nonmagnetic ones.

The instrument combines high sensitivity and simple fool-proof operation with rugged construction. All you have to do is to move the FT 80 above the ground. Loud signals emitted by the loud-speaker or soundproofed headphones, if used, indicate the proximity of the looked-for objects. In this manner large areas can be searched quickly and with full success even in the darkness.

Technical Specification

Weight	1.2 kg
Dimensions	35 x 28 x 12 cm
Power supply	1 battery E Block 9 V
Depth range	50 cm

Magnetic Cap Lifter MKH

To be used for loosening and lifting jamming road and slide caps, manhole covers and similar metal covers using magnetic force, even if webs and lugs are broken out. Road caps buried not too deep underground can also be located without stressing the material. Dropped tools can be hoisted from a pit. Our Magnetic Cap Lifter MKH can help you in many fields of application such as water and gas works, electric power stations, fuel bunkers, petrol stations, repair shops, fire brigades, industrial warehouses and assembly shops etc. The instrument is supplied ready for use, it does not require any maintenance or training of the staff. Just unwrap, assemble, search and hoist caps in a single pass - it's easy and fast to do.
